McAfee VirusScan Mobile

Proven Security on the Go

Mobile phones are the next target for hackers and virus writers. Malicious software (malware) for wireless devices is growing even faster than it did in the early days of the PC. Take preventive measures to secure your mobile device today.

Mobile security is essential to stay connected to friends and family while protecting sensitive personal information and irreplaceable data such as photographs and contact information. McAfee® provides a mobile security solution that protects wireless devices from viruses, secures personal information and helps keep critical communication features always working.
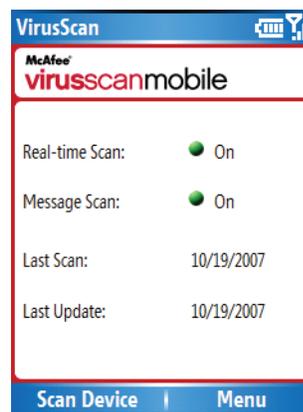

Be Smart—Secure your Mobile Device

Security threats like viruses, worms, Trojans, profit malware or SMishing have become a reality for mobile phone users. Today's wireless devices are multi-interact via Bluetooth, SMS, MMS, WLAN, GPRS, 3G, PC Synch and P2P. Fast market release cycles, vulnerable technical architectures, unprotected hardware and the need for more personalization options have made mobile phones easy prey.

McAfee VirusScan® Mobile automatically secures your mobile device; it scans and cleans files, emails, Internet downloads, text and MMS messages, and attachments.

→ Always-on protection identifies and removes viruses, Trojans, worms, and other malicious applications and contents without interrupting your connections.

→ It detects at multiple entry and exit points, including email, instant message attachments, Internet downloads, SMS, MMS, WiFi and Bluetooth.

→ Automatically cleans infections, viruses, worms, Trojans, or other threats when found.

→ Patented technology specifically designed for mobile phones ensures optimal performance and user experience

Comprehensive and Resourceful Security

McAfee VirusScan Mobile is designed to provide comprehensive and resourceful protection at all vulnerable points so you don't have to worry about your security. Inbound email, outbound email and Internet downloads are protected with on-access scanning and on-demand scanning.

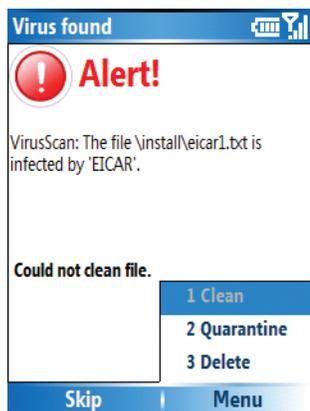

McAfee VirusScan Mobile protects your device from malware.

Protection for Virtual Environments

McAfee VirusScan Mobile requires minimal mobile computing and memory resources, allowing you to use your wireless device functions, including your phone, without interruption.

→ McAfee VirusScan Mobile is designed specifically for the mobile devices.

→ Download and installation are fast and easy.

→ Won't interrupt a call or interfere with other phone functions.
